High Efficiency Solar Panel Folding Kit 90w

Solar Energy might sound a little too technical for some people, HOWEVER, with the breakthrough technology, these Solar Panel Folding Kits are presented to you at affordable prices with easy installation and incredible efficiency.

This Solar Panel is made of high efficient and produces the smallest solar cells. Employed the cutting edge technology, the unique advanced textured cell surface reduces the reflection of sunlight and maximise light absorption. The Solar Panel delivers outstanding performance even in the challenging environment, including low light condition and cells being partly shaded. It also features tempered glass covering for hail resistance, and resisting steel ball falling down from 1m high.

Equipped with a bundle of practical and durable accessories, the solar panel is designed to withstand the harsh weather. The 5m cable with alligator clamps allows you to place your electronic appliances in a considerable distance. Supporting by sturdy adjustable stand, the panel will always be in a good shape and will not wobble. The frame is made from top range alloys, and is anodized, to resist rust. It also comes with protectors in every corner to protect itself, your car, and boat when moving around.
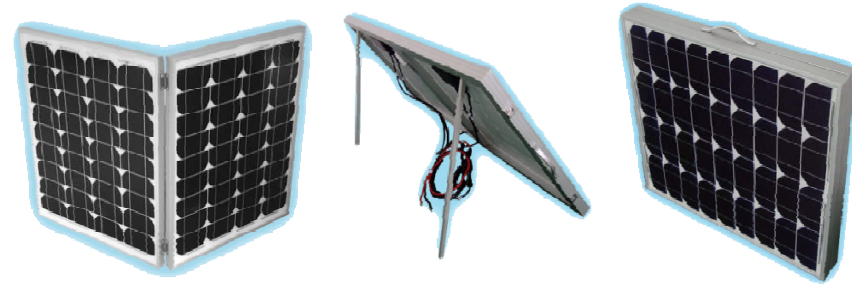

Despite the large surface of the panel for maximum light absorption, it can be folded and stowed away at ease, and carried around effortlessly with the carry bag. Each Folding series contains Dual Handles to help increase handling grip.

Being the top range of the market, the item is backed up by European Standard so you do not have to worry about its safety. In the meantime, **the Solar Panel output comes with a 25-year warranty for your peace of mind.**

Features

- High Performance Solar Panel
- Mono or Poly cells with 0-5% positive tolerance
- Low Reflection of Sunlight; High Light Absorption
- Equipped with a bundle of accessories
- Top Range Aluminum Anodized Frame
- Sturdy Adjustable; Stand withstand wind
- Functions perfectly under low light or panel partly shade

Specification	
Max power	90W
Max Power Voltage	17.5V
Max Power Current	5.14A
Open-Circuit Voltage	22V
Short-Circuit Current	5.71A
Operating Temperature	-20℃ to +60℃
Maximum System Voltage	600V Dc
Weight	10.3KG
Size	700*520*75mm
Contents	
Item Description	Quality
Solar Panel	2*45W
5m Cable with Alligator Clamps	1 set
12V or 24V DC Charger	1/pcs
Heavy Duty Protective Carry Bag	1/pcs
Manual	1/pcs
